

Angela Janevska

Backend & Full-Stack Developer

angela.janevska2002@gmail.com · angela0210.github.io · github.com/Angela0210 · linkedin.com/in/angela-janevska1

PROFESSIONAL SUMMARY

Final-year student at FSCE with ~3 years of hands-on experience in backend and full-stack development. Builds web applications, REST APIs, and enterprise systems using Python, .NET, Django, and FastAPI. Comfortable across multiple stacks simultaneously, from database design to MVC architecture. Skilled communicator with 3+ years teaching programming and AI to young students.

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, SQL

Backend: FastAPI, ASP.NET Core MVC, Django, Flask, REST APIs

Frontend: HTML, CSS, JavaScript, Bootstrap 5

Databases: SQL Server, MySQL, SQLite, PostgreSQL, relational design

Tools: Git, GitHub, Visual Studio, VS Code, PyCharm, Rider, IntelliJ, Postman, Swagger / SwaggerUI

Concepts: OOP, CRUD, MVC, layered architecture, API design

PROJECTS

Employee Leave Management System · ASP.NET Core MVC · C# · SQL Server

GitHub: <https://github.com/Angela0210/EmployeeLeaveSystem>

- Full-stack HR web app for employee leave requests, approvals, and balance tracking
- Role-based workflow separating employee and manager permissions
- Layered architecture: models, services, repositories, controllers
- Relational database design for employees, leave types, departments, and requests

RentalApp — Property Rental API · FastAPI · Python · SQLite

GitHub: <https://github.com/Angela0210/RentalApp>

- REST API for property listings, availability filtering, and async endpoints
- Layered architecture with clean separation of models, services, repositories, and API layer
- Tested and documented via Swagger UI

NestFind — Accommodation Platform · Django · Python · SQL

GitHub: <https://github.com/Angela0210/NestFind>

- Accommodation search and listing platform with property browsing and structured data management
- Built with Django, covering models, views, templates, and URL routing

EXPERIENCE

Python, Web Development & AI Instructor · Algorithmics Macedonia — Skopje, MK 2022 – Present

- Teach Python, HTML, CSS, JavaScript, Flask, and introductory AI concepts to students aged 7–17
- Introduce AI fundamentals — how models work, prompt design, and practical tools
- Design lesson plans and hands-on projects adapted to different skill levels
- Mentored 50+ students through first projects, debugging, and computational problem-solving
- Develop strong communication skills by translating complex concepts into simple explanations

EDUCATION

BSc in Applied Science in programming · Expected 2026

Faculty of Computer Science and Engineering (FSCE) — Ss. Cyril and Methodius University, Skopje

Relevant courses: Data Structures, Web Development, Internet Technologies, Software Engineering, Databases, OOP, .NET Development

CAREER OBJECTIVE

To gain practical experience in backend engineering by contributing to real-world, enterprise-level applications — improving skills in scalable API design, clean architecture, and professional software development workflows.

LANGUAGES & INTERESTS

Languages: English (Fluent) · Macedonian (Native)

Interests: Backend Development · API Design · System Architecture · Software Engineering
